

SP-1^T~8^T

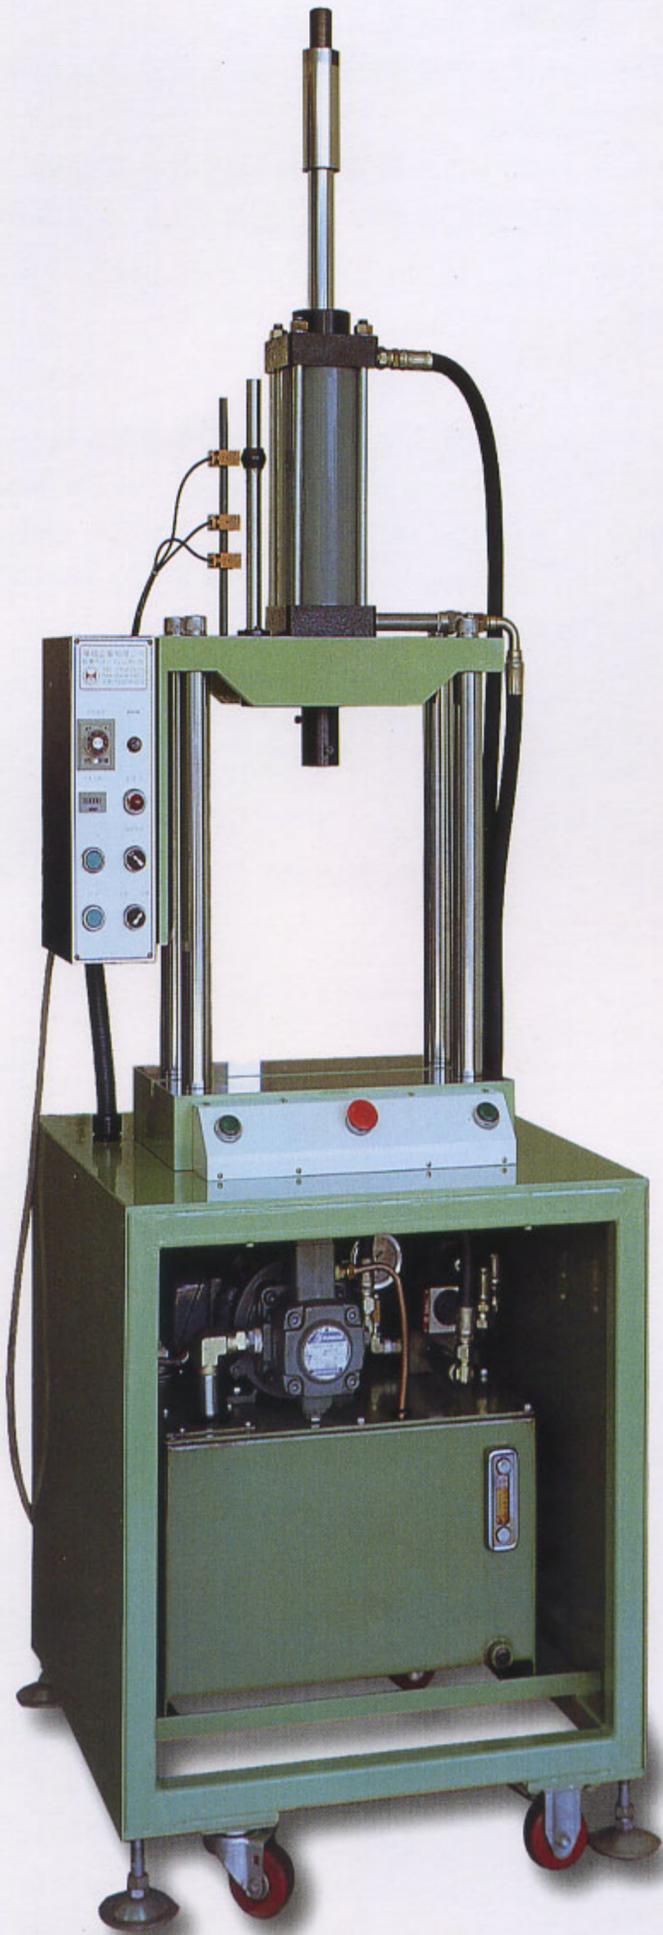

四柱型油壓壓床 FOUR-COLUMN TYPE OIL PRESS

特點：

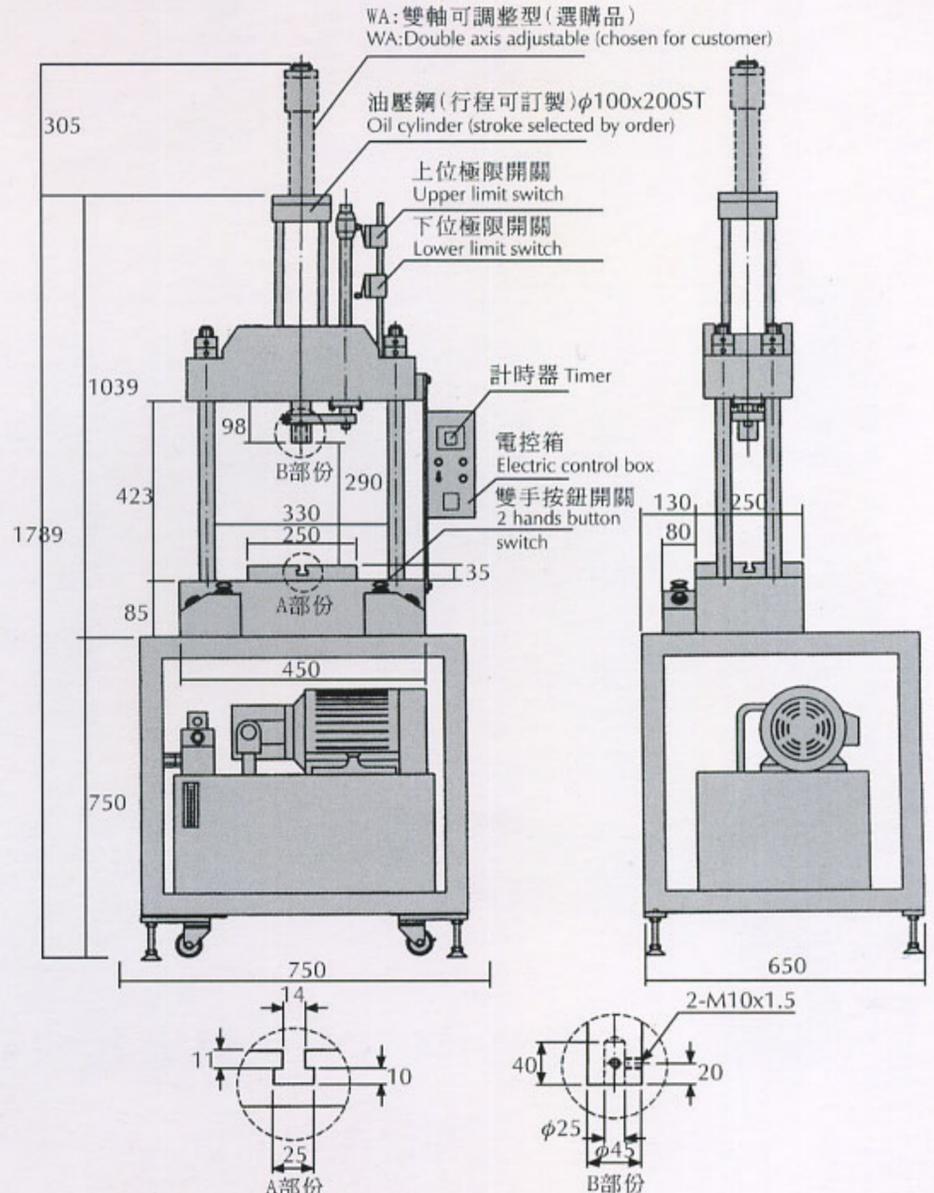

- * 以油壓為動力源，壓力大，線速度穩定，耐操，故障率低。
- * 採寬柱式設計，機械剛性強，加工穩定。
- * SUP 型採三層模式設計，機械剛性強，加工穩定平行精度0.02m/m 內價格較大沖床便宜數倍。
- * 動作行程大，可全程高推力或選擇未負載低壓，負載時高壓作動。
- * 安全設定周全，採雙按開關啓動，+緊急停止鈕，+下降停止時間調整(time)，+自動、手動(調模)電路設計，並且有上下極限開關，可做為行程調整。

Character:

- * Oil power, high pressure, stable liner speed, endurant, low trouble.
- * Designed for wide-column, strong mechanical rigidity, stable in processing.
- * Three layers mode for SUP type, strong mechanical rigidity, and stable in processing that parallel precision is within 0.02 m/m, the price is lower than big punching machine to several times.
- * Large stroke, high thrust entire stroke or lower pressure unload and higher pressure when load.
- * Comprehensive safety instrument, double button switch on,+emergency button,+down stop time adjustment,+automatic, hand (mode adjustment) circuit design, and there are upper and lower limit switches to adjust stroke.

型號 (MODEL) : SP-1^T~8^T

- * 以上為參考數值，可配合廠商要求。
- * The height manufactured on customer's requirement.
